

3.18 (*Sales-Commission Calculator*) One large chemical company pays its salespeople on a commission basis. The salespeople receive \$200 per week plus 9% of their gross sales for that week. For example, a salesperson who sells \$5000 worth of chemicals in a week receives \$200 plus 9% of \$5000, or a total of \$650. Develop a program that will input each salesperson's gross sales for last week and will calculate and display that salesperson's earnings. Process one salesperson's figures at a time. Here is a sample input/output dialog:

```
Enter sales in dollars (-1 to end): 5000.00  
Salary is: $650.00
```

```
Enter sales in dollars (-1 to end): 1234.56  
Salary is: $311.11
```

```
Enter sales in dollars (-1 to end): -1
```
